

TESTIMONIAL

FOR NON CHEMICAL WATER TREATMENT

Date: November 23,2017

Progress Report of the Non Chemical Water Conditioner

LIMETRON 15mm (1/2") Diameter at my Domestic Residence.

Product Installed:

Device-1: LIMETRON 20mm(3/4")Nos.- 1,

Date of Installation: 18.03.2017

Installed and service provided by:

SKYMECH Engineers Private Limited, Jaipur (Raj.)

I was facing problems with my borewell water which was having a TDS of 810 at my residence. Taps were getting clogged due to salt deposits. Buckets had layers, bathroom floor stained, solar water heater corrosion. I consulted the water experts to treat water. They offered water softeners which were costing around 55k and had to be monitored and maintained. I was looking for something which is of fit and forget type of

appliance. I searched the Internet and found LIMETRON by fluid dynamics which seemed to be the equipment I was looking for but it was based out of our country, but luckily they had a Indian outlet SKYMECH Engineers P. Ltd. at Jaipur. I contacted Mr. Bainsi Ram (GM SEPL) he was so helpful and gave me a clear picture of the product and the assurance he gave me made me purchase the product which was 25 k plus. I am using LIMETRON half inch for my domestic residence and I see after 3 months there is very little scaling. I am satisfied with this product.

Thanks & Regards,

Mr. S. K. Mahesekar (Scientist)
